

Est. 2003

Western Engineering Consultants, Inc.

PROJECT EXPERIENCE

2005-2006

0023.001.00

Highlights

32 Residential lots, 3 commercial properties and 1 multi-family lot subdivision

Project Cost

\$1,000,000 Construction & Consulting costs

Client

Whitfield Construction

Whitfield Construction is a locally owned company producing quality products since 1966. Its latest development, Chapel Hill, is their most exciting concept yet.

Project Description

Whitfield's approached Western Engineering Consultants, Inc. (WECI) to take over and gain approvals through the City of Brighton for their exclusive community. Based on the conceptual design of "Colorado Style," these homes will outfitted with elements of carefully chosen stone, stucco, natural wood, and copper accenting as shown in the picture above. Located in Brighton, these design build Villas are traditionally beautiful, with a contemporary flair.

WECI was hired for its expertise of completing development in the City of Brighton. WECI took this property through the Brighton Development Review process, platting and engineering applications for the project. WECI provided site designs including – local roadways, CDOT Highway 7 widening, grading, water, sanitary sewer, storm sewer, and drainage pond infrastructure designs for the 32 residential, 3 commercial, and 1 multi family lot subdivision.
